1225 – AAL77 checked on the Washington ARTCC (ZDC) Linden (R05) sector's frequency climbing out of 13,000 feet for 17,000 feet. R05 acknowledged and issued AAL77 a climb clearance to FL270.

1226 – AAL77 acknowledged for climb clearance.

1230 – AAL77 was Issued a frequency change to 133.27.

1231 – AAL77 checked on the ZDC Moorefield (R03) sector's frequency climbing through FL251 for FL270. R03 acknowledged and issued AAL77 a climb clearance to FL290. AAL77 acknowledged.

1234 – AAL77 was instructed to turn twenty degrees to the right, vectors for his climb. AAL77 acknowledged.

1237 – AAL77 was recleared direct to Henderson and issued a climb clearance to FL390. AAL77 acknowledged for the clearance and subsequently requested FL350 as a final. R03 acknowledged and issued AAL77 an amended clearance to FL350.

1239 – Indianapolis ARTCC (ZID) called R03 and requested that AAL77 stop his climb at FL330. R03 then instructed AAL77 to amend his altitude to FL330. AAL77 acknowledged.

1240 – AAL77 was Issued a frequency change to ZID on 120.27. AAL77 acknowledged.

14 CHRONOLOGICAL SUMMARY OF FLIGHT (including control or other services provided by ATS facilities, and emergency action taken.)

September 11, 2001

ALL TIMES BELOW ARE COORINDATED UNIVERSAL TIME
UNLESS OTHERWISE SPECIFIEO

- 1240 - AAL77 was transferred from Washington ARTCC to Indianapolis ARTCC, Henderson Radar sector's (HNN-R) frequency, and reported level FL330. HNN-R acknowledged AAL77's initial call and instructed the flight to squawk code 3743. AAL77 acknowledged the code assignment.
- 1243 - HNN-R cleared AAL77 to climb and maintain FL350. AAL77 reported leaving FL330 for FL350.
- 1247 - HNN-R instructed AAL77 to turn 10 degrees right vectors for traffic. AAL77 acknowledged the turn.
- 1250 - HNN-R cleared AAL77 direct to Falmouth VOR (FLM). AAL77 acknowledged the clearance. HNN-R initiated a handoff to DACOS Radar sector (DAC-R). At this time AAL77 was level FL350 and the data block was in "flat track".
- 1256 - HNN-R made 3 calls to AAL77 during this minute (1256). None of the transmissions were acknowledged by AAL77.
- 1257 - HNN-R asked AAL77 for a radio check. AAL77 did not reply. HNN-R advised DAC-R that AAL77 appeared to turn toward the south; the aircraft's altitude was uncertain; the last clearance was to maintain FL350 and proceed direct FLM. DAC-R advised they would try to contact AAL77. AAL77's data block had gone into coast status.
- 1258 - HNN-R made 3 calls to AAL77 during this period (1258). AAL77 did not acknowledge any calls made to the flight.
- 1258 - DAC-R called AAL77. AAL77 did not acknowledge.
- 1259 - DAC-R transmitted to AAL77 and received no acknowledgment.
- 1300 - HNN-R called AAL77, no reply. AAL2493 called HNN-R and advised they had sent a message to dispatch to have AAL77 contact ZID on frequency 120.27. HNN-R advised AAL2493, that earlier they had AAL77 in radar coverage on the west side of their airspace. The flight's data block had gone into coast, then disappeared, and they no longer had radio contact with the aircraft.
- 1300 - DAC-R called AAL77. AAL77 did not acknowledge.
- 1303 - HNN-R attempted to contact AAL77 and received no acknowledgment.

14 CHRONOLOGICAL SUMMARY OF FLIGHT (including control or other services provided by ATIS facilities, and emergency action taken)

September 11, 2001

ALL TIMES BELOW ARE COORDINATED UNIVERSAL TIME
UNLESS OTHERWISE SPECIFIED

1333 - IAD Controller advises DCA Controller on 462 line that there is a primary target 10 west of DCA heading for P56, fast moving. Subsequently, DCA has radar contact on fast moving target.

1334 - DCA Tower Controllers visually observe the fast moving target, a B757, completing a right 360 turn, just south of the Pentagon. Subsequently, IAD Controller informs IAD Operations Supervisor, whom in turn advises the DCA Operations Supervisor. The DCA Operations Supervisor advised the United States Secret Service (USSS) via the "Hotline" of the aircraft.

1336 - DCA instructs a military C130, GOPHR06, a scheduled flight off of Andrews Air Force Base, to intercept the aircraft and identify it. GOPHR06 reports a B757, low level and fast moving. USSS is advised.

1338 - GOPHR06 reports that the B757 has crashed into the Pentagon.

1339 - DCA Controller advises IAD Controller that the B757 crashed into the Pentagon.

1310:37 HNN RA all right this is henderson

1310:38 DAC RA okay

1310:39 HNN RA there was an american eleven---departed off of uh new york
goin to l a got hijacked american seventy seven departed off of
dulles is going to l a dispatch doesn't know where he's at and
confirmed that two airplanes have been uh they crashed into uh
the world trade center in new york---so as far as american
seventy seven we don't know where he is but they say that uh
american eleven was hijacked off of---a new york airport going
to l a x and uh

1311:07 DAC RA but we don't have a track on him

1311:09 HNN RA affirmative

1311:10 DAC RA you mean like they just took off without a clearance

1311:12 HNN RA no you mean american eleven

1311:13 DAC RA yeah

1311:14 HNN RA he's he's depart well i guess he did cause he was going to l a

1311:18 DAC RA but nobody ever tracked american eleven is what i'm asking

1311:21 HNN RA i don't know that i don't

1311:21 DAC RA oh okay

1311:22	HNN RA	know just where he left from or uh
1311:24	DAC RA	there's no flight plan in the machine right now and
1311:25	HNN RA	yeah i just looked at that too
1311:25	DAC RA	i'm
1311:27	HNN RA	but as far as what we know that's all that's all we know i talked to dispatch and that's what they relayed---and they confirmed it here that i guess two airplanes about crashed into the the trade center

I was working DØ3 for the above time while it was very busy. I did most of the coordination for RØ3 during this busy time. At 1239 UTC HNN High yelled on the 90 Line to stop ^{TV AAL} ~~AAL~~ 77 at FL 330. I answered the 90 Line to stop AAL77 at FL 330 and then advised RØ3 to ammend AAL77's climb. RØ3 then issued AAL77 FL 330. After AAL77 read back FL 330, I then coordinated with Indy Center who wanted to talk to AAL77 since he was stopped at BoB altitude with HNN having the handoff. Indy said HNN. AAL77 was then switched frequency to Indy's HNN sector. I do not recall the equipment configuration while I was on the D-side.

I certify, to the best of my knowledge and recollection, the above statement is correct.

TEXT OF STATEMENT:

Between 1255-1300Z I was informed by an employee that an explosion had been reported at the World Trade Center. The CNN picture looked as if an aircraft might have struck the building, so at approximately 1300Z I walked over to phone the Air Traffic Manager of the event. I was interrupted by an operational supervisor who

advised me that ZID-95 (HNN) had been working AAL77 at FL350 but had lost both radar contact and voice communications with the aircraft.

During that conversation, I heard a shout from across the aisle from people were monitoring CNN on an event monitor. They had observed an aircraft crash into the second WTC tower. At about 1303Z I called the operational supervisor from Area 3 to get details of the time radar contact was lost and last observed position of AAL77. I advised the supervisor to make appropriate calls forward along route of flight to block airspace. Between 1303-1310 I selected the "all primary" button on the radar scope in front of me to see if there were any primary targets in the vicinity or along the flight plan route of AAL77. None were observed.

At approximately 1305Z I paged ZID-505 to request assistance from QA in gathering voice recording and NTAP data.

At approximately 1305Z I asked a traffic management coordinator to call the ATCSCC and advise that we were missing an aircraft. I forwarded my concern that in light of unfolding events in New York, AAL77 could be a hijacked aircraft.

At about 1310Z I called the ARTCC to advise that ZID had lost Radar contact and voice communications with AAL77. I advised the RCC that American Airlines had reported that another aircraft had been hijacked.

Between 1310 & 1315Z I asked TMU personnel to call Air Force Search & Rescue and advise of the missing aircraft.

At approximately 1315 I called the West Virginia State Police to advise of the possibility of a downed aircraft and to ask if any reports of a downed aircraft had been received.

for

Between 1320-1325Z I called the ZAU Operations Manager-in-charge to advise him of my growing concern that AAL77 might have been hijacked and that he should be on the lookout. My own thoughts were concerned with the Sears Tower.

About 1340Z I was notified that the Pentagon had been hit.

I do not remember what the various settings of the operational equipment were at the time of the accident. The events described above happened so quickly that I am not certain of the exact times or order of each call.

(Kevin Schiott), I asked him to call search and rescue looking for AAL77. Beacon code 3743, ELT's in vicinity of YRK VOR / Ashland Boyd airp AT 1303Z, I called AAL dispatch (who HNN "D" had already called for frequent retrieval) and talked with Jim McDonald, I queried if there had been any contact from AAL77's crew reference maintenance or indications of a problem. Jim (AAL) checked ACARS for position reporting; there had been no reports yet. The next ACARS report was to be at CVG. We exchanged names and direct telephone numbers for follow up. Jim (AAL) said they were trying AAL77 on their cell call to the aircraft but was getting nothing. At 1307Z, I tried calling LEX APCH to search for extra beacon codes. I was switched to the control tower, put on hold, and eventually hung up. Either before 1314Z or right after, I received a return call from Jim McDonald (AAL). He stated that another of their aircraft had been hijacked and crashed into the World Trade Center. He thought AAL77 had also been done as such. I recall stating that there had not been sufficient time for that to occur with AAL77 and that we were still looking for them. There had been numerous coordination with ZID Tmu and the ZID Operations Manager for this search. AT 1314Z, I called ZDC to coordinate Routes for Aircraft eastbound. I terminated the call when I heard the call sign AAL77 on guard frequency. I broadcasted on UHF + VHF guard for AAL77. It was AAL683 trying to raise AAL77 on frequency communication. At 1316Z, I called ZDC back to resume coordination, then I realized I had called the incorrect area. At 1317Z, I called ZDC, Area 3 (Tm), to coordinate eastbound aircraft. I shared that we were trying to track down AAL77 who we lost radar on frequency contact west of HNN VOR at FL350. I requested that should AAL77 or something come up on AAL77 with ZDC, please let us know as we had not confirmed what had happened yet. Intermix with all of the above were tasks of staffing for assistance at sectors requesting all Area 3 controllers to look for AAL77's beacon, then to look for a hijack code, then primary targets. Also coordination for clearing all aircraft the the nearest/feasible airports to land. Also checking for the HNN Sector Team and then getting staffing relief for them from their positions. I do not remember what the various settings of the operational equipment were at the time of the incident.

On September 1, 2001 my first involvement with AAL 77 was when Area 3 Supervisor Linda Povinelli called to report that they had lost the transponder and communications to AAL 77. She related the last known position was YRK 080010, and ^{she} ~~she~~ requested that I call Air Force Search and Rescue about the incident. From the ESP position (Scope 60) I brought up AAL 77's data block and noticed the position symbol was in coast track, so I brought up primary targets and I didn't observe any in the area. I immediately called Air Force Search and Rescue.

I talked to Air Force Search and Rescue about three or four times over the following 45 minutes relaying information as requested and as it became available. I do not remember what the various settings of the operational equipment were at the time of the accident.
